HENNGE Recruitment Team

HENNGE K.K.

Shibuya, Tokyo

Japan

Subject: Application for Global Internship Program (GIP) - Full Stack Engineering Pathway

Dear HENNGE Recruitment Team,

I recently read the article from your engineering team about what makes a good candidate. I really liked that HENNGE looks for the “Why” behind the code, not just the skills. I also connect with the idea of “Henka” (Change) and being a “Learnaholic.”

I am writing to apply for the **Global Internship Program (GIP)**. I believe my experience in building scalable systems fits well with what you are looking for.

My biggest learning moment was during my final thesis project with **TIME Language Centre**. They needed a system that could scale with their growing operations. Building this from scratch was a massive challenge. I decided to architect a **Microservices** solution because I wanted flexibility and long-term stability. This required me to learn entirely new concepts rapidly. This experience pushed me to be a true “Learnaholic”, adapting to complex engineering challenges to solve real business problems.

Why HENNGE and why Japan? During my internship at **Toyota (Auto2000) in Indonesia**, I was introduced to the philosophy of *Kaizen* (continuous improvement). I admired how this mindset was applied daily to refine processes. I see HENNGE as the embodiment of this spirit in the software world. I have a genuine passion for Japan and its culture, and I am driven to build my life and career in Tokyo, contributing to a team that values precision, innovation, and excellence.

I have finished my classes and am now just working on my thesis (graduating Nov 2026). I am available to join your internship immediately. I am excited to bring my skills in **Go** and **Microservices** to learn and grow with your team.

Thank you for reading my story.

Sincerely,

Khairil Rahman Hakiki
