HENNGE Recruitment Team
HENNGE K.K.
Shibuya, Tokyo
Japan

Subject: Application for Global Internship Program (GIP) - Full Stack Engineering Pathway

Dear HENNGE Recruitment Team,

I have long admired HENNGE's culture of innovation and your commitment to solving complex problems. I strongly resonate with the core values of "Henka" (Change) and being a "Learnaholic." To me, this means always looking for the "Why" behind the code and continuously evolving as an engineer.

I am writing to apply for the **Global Internship Program (GIP)**. I believe my experience in building scalable systems and my passion for learning fit well with the Full Stack Engineering pathway.

My biggest learning moment was during my final thesis project with **TIME Language Centre**. They needed a system that could scale with their growing operations. Building this from scratch was a massive challenge. I decided to architect a **Microservices** solution because I wanted flexibility and long-term stability. This required me to learn entirely new concepts rapidly. This experience pushed me to be a true "Learnaholic", adapting to complex engineering challenges to solve real business problems.

Why HENNGE and why Japan? During my internship at **Toyota (Auto2000) in Indonesia**, I was introduced to the philosophy of *Kaizen* (continuous improvement). I admired how this mindset was applied daily to refine processes. I see HENNGE as the embodiment of this spirit in the software world. I have a genuine passion for Japan and its culture, and I am driven to build my life and career in Tokyo, contributing to a team that values precision, innovation, and excellence.

I have finished my classes and am now just working on my thesis (graduating Nov 2026). I am available to join your internship immediately. I am excited to bring my skills in **Go** and **Microservices** to learn and grow with your team.

Thank you for reading my story.

Sincerely,

Khairil Rahman Hakiki
