EDUCATION

State Islamic University of Imam Bonjol Padang

Graduated November 2026

Bachelor's Degree, Information Systems

Padang, Indonesia

- **Relevant Courses:** Data Structures & Algorithms, Software Design, OOP, Computer Networks, Linear Algebra.
- **Thesis:** Decoupled a course platform into event-driven microservices to resolve synchronous bottlenecks and latency degradation under high concurrent traffic; achieved **96.56 RPS** with **0.00% error**, sustained zero message loss across 14k+ webhook events, and cut P95 latency by **58.9% (to 55.7ms)** via horizontal scaling.

EXPERIENCE

TIME Language Centre

September 2025 – February 2026

Software Engineer (Capstone-Project)

Padang, Indonesia (Hybrid)

- Designed and developed an **event-driven microservices backend architecture** (Go/Fiber, Node.js) for the online learning platform and built the internal **ERP system** automating scheduling, admissions, and operations.
- Configured **RabbitMQ (AMQP)** with persistent exchanges and **DLQ** for reliable async inter-service messaging.
- Provisioned and maintained containerized infrastructure on **Kubernetes (K3s)** with **Nginx API Gateway**, standardizing reverse proxy routing, TLS termination, and service isolation.
- Deployed **observability suite** (Prometheus, Grafana, Loki) for real-time metric dashboards and log aggregation.
- Implemented comprehensive **automated testing** across services, conducting **unit, integration, and end-to-end tests** (Go Test, Jest) alongside **load testing** using **Grafana k6**.

CodeAtHome

April 2025 – December 2025

Software Developer (Part-time, Frontend-Heavy)

Remote

- Delivered responsive web features and integrated REST APIs for client-facing applications across diverse domains.
- Optimized frontend network performance using **TanStack Query** for query caching and optimistic UI updates.
- Structured predictable client-side state management for complex multi-step user workflows using **Redux Toolkit**.
- Built a modular, reusable UI component library, reducing boilerplate code across client web projects.

Auto2000 (Astra International)

January 2025 – March 2025

Software Engineer Intern

Labuhanbatu, Indonesia (Onsite)

- Built a Next.js dealership platform with an interactive vehicle recommendation engine.
- Engineered an automated document expiry reminder system with **RBAC**, eliminating manual tracking.
- Built Python automation pipelines to clean and migrate **15 years** of legacy vehicle service records.

PROJECTS

[More projects at kiril.is-a.dev/projects](https://kiril.is-a.dev/projects)

Slither | Go, Docker, Redis, WebSocket, Postprocessing, React Three Fiber

[GitHub](#)

- Engineered a **high-concurrency** multiplayer game server in Go, leveraging **Redis Pub/Sub** for state synchronization and **O(1) Spatial Hashing** to manage collisions for **10,000+** entities.
- Minimized bandwidth overhead implementing **delta compression** and maintained **60 FPS** synchronization using **Client-Side Prediction and Reconciliation**.

Personal Website | TypeScript, Next.js, MDX, Docker, Bun, Elysia, Serverless, LLM

[GitHub](#)

- Built high-performance portfolio with custom **MDX blog engine** achieving **99+** Lighthouse score; integrated **AI chatbot** with streaming responses, multi-turn context, and cost-optimized prompt engineering.
- Shipped high-performance **Guestbook** service via **Bun/Elysia** and published a [technical blog](#).

OPEN SOURCE CONTRIBUTIONS

- **Google Go GitHub:** Fixed JSON unmarshalling in Enterprise billing API by correcting type definitions. ([PR](#))
- **OpenTelemetry Collector:** Prevented Prometheus errors by removing deprecated legacy references. ([PR](#))
- **Meilisearch Go Client:** Unlocked filtering by refactoring type constraints for array-based queries. ([PR](#))
- **Next AI Draw IO:** Fix and Implemented dynamic scroll shadows to enhance canvas viewport navigation. ([PR](#))

HONORS & CERTIFICATIONS

- **AstraPay Hackathon 2026 (Finalist):** Enabled collateral-free MSME financing via QRIS credit scoring.
- **PIDI DIGDAYA Hackathon 2026 (Semifinalist):** Prevented resume fraud via browser sandbox work-trials.
- **Certifications:** Oracle Cloud 2025 AI Foundations Associate ([Badge](#)), LPPI DIGDAYA Practitioner Phase ([Cert](#)), Dicoding AI in Web Applications ([Cert](#)), and [43+ more on LinkedIn](#).

TECHNICAL SKILLS

Languages: Go, TypeScript, Python, SQL, Bash

Key Technologies: Docker, Kubernetes, Redis, RabbitMQ, Nginx, MySQL, PostgreSQL, MongoDB, SQLite, gRPC, GraphQL, OAuth2, Ubuntu, Prometheus, Grafana, Loki, OpenTelemetry, Meilisearch, k6, AWS, GCP
